

Appl. No. 10/654,990
Amendment dated: October 12, 2005
Reply to OA of: July 12, 2005

This listing of claims will replace all prior versions and listings of claims in the application.

Listing of Claims:

1(currently amended). A detachable restoration tooth, comprising:
a bottom provided with a cavity extending into the interior of said detachable restoration tooth and to accommodate an outer crown used to be securely fitted on or freely detached from an inner crown fitted over a mended abutment of a restored tooth, an outer surface having a boundary edge in relation to said bottom; and
a top having two boundary edges in relation to the outer surface whereby said top is provided with two connection portions for being attached to the top of a tooth adjoining the restored tooth, wherein said connection portions extend horizontally along the entire side of the restoration tooth to which they extend from and each extending from one of said two boundary edges.

Claim 2(canceled).

3(previously presented). A detachable restoration tooth, as recited in claim 1, wherein said connection portions are attached to a projection of the side of teeth adjoining a restored tooth.

4(original). A detachable restoration tooth, as recited in claim 1, wherein said connection portions are provided with a lateral connection portion.

5(currently amended). A detachable restoration tooth, comprising:
a bottom provided in one side thereof with a cavity extending into the interior of said detachable restoration tooth and to accommodate an outer crown used to be

securely fitted on or freely detached from an inner crown fitted over a mended abutment of a restored tooth, and in other side thereof with a protruded portion;

an outer surface having a boundary edge in relation to said bottom; and

a top having two boundary edges in relation to the outer surface whereby said top is provided with two connection portions for being attached to the top of a tooth adjoining the restored tooth, wherein said connection portions extend horizontally along the entire side of the restoration tooth to which they extend from and each extending from one of said two boundary edges.

Claim 6(canceled).

7(previously presented). A detachable restoration tooth, as recited in claim 5, wherein said connection portions are attached to a projection of the side of teeth adjoining a restored tooth.

8(original). A detachable restoration tooth, as recited in claim 5, wherein said connection portions are provided with a lateral connection portion.
